Summary

Results-driven Full Stack Web Developer with 3+ years of experience designing and delivering scalable web applications across diverse industries. Proficient in both front-end and back-end development, with hands-on expertise in React, Laravel, Node.js, and TYPO3. Adept at collaborating in agile, cross-functional teams and managing the full development lifecycle — from system architecture to deployment. Actively seeking a challenging role where technical excellence and collaborative innovation drive impactful solutions.

Education

Master's Degree, National Engineering School (ENSA), Software Engineering and Information Systems Management, Kenitra, Morocco — 2022–2024

Bachelor's Degree, Faculty of Sciences and Techniques (FST), Distributed Computing Systems, Marrakech, Morocco — 2020–2021

DEUST Diploma, Faculty of Sciences and Techniques (FST), Mathematics, Computer Science, Physics, Marrakech, Morocco — 2018–2020

Baccalaureate Diploma, Cadi Ayyad High School, Physical Sciences, Marrakech, Morocco — 2017–2018

Experience

Schommer Media, Full Stack Web Developer — Marrakech, Morocco, 09/2024–Present

- Engineered a Progressive Web App (PWA) to streamline property management and maintenance workflows, reducing manual reporting overhead.
- Built a centralized ticket management system enabling tenants to report facility issues and empowering managers to track, prioritize, and document resolutions in real time.
- Delivered multiple client-facing websites for the German market using TYPO3 CMS — handling PHP backend logic, HTML/CSS templating, and system architecture design.
- Defined and implemented scalable project architecture for TYPO3-based solutions, ensuring maintainability and adherence to client specifications.
- Collaborated with cross-functional teams to manage development tickets, coordinate task delivery, and uphold sprint timelines.
- **Technologies:** ReactJs, Ionic, Laravel, MySQL, PHP, TYPO3, HTML, CSS

CloudLink, Full Stack Web Developer Intern — Marrakech, Morocco, 03/2024–07/2024

- Developed a SaaS platform that empowered IBM ODM users to convert business workspace rules into machine learning models, reducing manual ML setup time.
- Automated extraction of rules, data flows, and request/response structures to generate high-quality ML training datasets.
- Containerized the application using Docker, improving deployment consistency across environments.
- **Technologies:** ReactJs, NodeJs, Machine Learning, Docker, MongoDB

Majorel, Content Moderator — Marrakech, Morocco, 2022–2024

- Reviewed and analyzed user-reported content at scale, maintaining compliance with client content policies.
- Upheld high-quality moderation standards while meeting daily throughput targets in a fast-paced environment.

ONDA – IT Department, Software Developer Intern — Marrakech, Morocco, 10/2021–12/2021

- Designed and developed a full-featured web application for managing employee records and HR documentation.
- **Technologies:** Spring Boot, Angular

ZSMART SERVICES, Software Developer Intern — Marrakech, Morocco, 04/2021–07/2021

- Built a role-based e-learning platform supporting distinct teacher and student access workflows.
- Integrated a semester calendar for course scheduling and developed a custom form-builder tool for instructors.
- **Technologies:** Spring Boot, Angular

Projects

E-Commerce Web Application

- Designed and developed using Node.js (backend) and ReactJs (frontend).

Concierge Service Website

- Implemented using WordPress as a freelance developer.

Node.js npm Package

- Developed to extract current cryptocurrency exchange rates.

Android Mobile Application

- Developed to manage bank agencies with Google Maps integration and contact information.

Wedding Planner Morocco

- Showcase website for weddings, events, and services targeting the Marrakech market, featuring dynamic galleries and a contact flow via PHPMailer.
- **Technologies:** Next.js, PHPMailer

UpToMarrakech

- Concierge platform showcasing tourism services across Marrakech, with real-time data and user management powered by Firebase and Firestore.
- **Technologies:** Next.js, Firebase, Firestore
